

Waterproofed  
roof

# Hexasteel DoP Eventail

Smoke vents range

NSHEV Double Flaps (Pneumatic)  
CE - This smoke vent meets the European regulation EN 12101-2 in force.

Hexasteel DoP Eventail (two opening flaps) is designed for waterproofed roof, and can be controlled by thermofuse and/or central pneumatic box.

This smoke vent is a veritable innovation. With its foldable windshields, the DoP Eventail can reach a high level of aerodynamic performances, while preserving the aesthetic aspect of the building.

# Hexasteel DoP Eventail

Smoke vents range

Hexasteel DoP Eventail in waiting position

Hexasteel DoP Eventail in safety position - Opening 90°

#### COMPONENTS:

- A metallic upstand 30, 40 or 50 cm high, which can be equipped with an insulation board 15 mm ( $U_f = 2.5 \text{ W/m}^2 \text{ K}$ ) or 30 mm ( $U_f = 1.5 \text{ W/m}^2 \text{ K}$ ). The surface of the insulation can be bitumen or PVC coated for a direct weld with the waterproofing membrane.
- An aluminium frame which protects the periphery of dome or PCA.
- A thermofuse pre-installed in the factory.
- Two opening flaps controlled by thermofuse and/or central pneumatic box. The opening power is given by 2 CO<sub>2</sub> piston integrated in the whole system. The opening and closing function is controlled from the floor by activating a CO<sub>2</sub> cartridge for opening and a CO<sub>2</sub> cartridge for closing.
- In option, an electric drive 230V can be installed for daily ventilation purpose (opening of 30 cm).
- Aerodynamic devices type Eventail in galvanized steel, integrated to the complete system (installed on the smoke vent in our premises).

#### FILLING:

- Our standard:
  - PCA 10 mm 4 skins
- In option:
  - PCA 16 mm 7 skins
  - Insulated aluminium cover

*For additional details, see the rubric of the options.*

Working	Type B opening + closing
Cycles	Re 10,000 (daily ventilation) + Re 1,000 (smoke extraction)
Snow load	SL 250 or SL 550
Low Temperature	T (-15°)
Wind load	WL 1 500 Pa
Resistance to heat	B 300 °C
