Adaptation**

# Hexacoif DoE Eventail

Smoke vents range

*NSHEV for renovation application  
Double Flaps (Electric)*
*CE - This smoke vent meets the  
European regulation EN 12101-2  
in force.*

Hexacoif DoE (two opening flaps) is designed to fit with all kind of existing support (concrete, steel, wood...), and can be controlled by thermofuse and/or electric control box.

This smoke vent is available in 2 levels of aerodynamic performances (STANDARD and PLUS).

This smoke vent is a veritable innovation. With its foldable windshields, the DoE Eventail can reach a high level of aerodynamic performances, while preserving the aesthetic aspect of the building.

Dimensions		Performances				Characteristics							
DT = DB I x L in m	Geometrical Area (Av) in m <sup>2</sup>	Aerodynamical Area (Aa)		Nb of pistons	Filling with PCA 10-16				Filling with Aluminium cover

# Hexacoif DoE Eventail

Smoke vents range

*Hexacoif DoE Eventail in waiting position*

*Hexacoif DoE Eventail in safety position*
**COMPONENTS:**

- A metallic upstand in galvanized steel of 150 mm high, which can be installed on all kind of existing support (concrete, steel, wood...).
- This product also allows to transform the original function of an existing skylight, while conserving the existing upstand.
- Two aluminium frames which protects the periphery of dome or PCA.
- A thermofuse pre-installed in the factory (in option).
- Two opening flaps controlled by thermofuse and/or electric control box. The opening power is given by a 24V drive integrated in the whole system.
- Aerodynamic devices type Eventail in galvanized steel, integrated to the complete system (installed on the smoke vent in our premises).

**FILLING:**

- Our standard:
  - PCA 10 mm 4 skins
- In option:
  - PCA 16 mm 7 skins
  - Insulated aluminium cover

*For additional details, see the rubric of the options.*

Working	Type B opening + closing
Cycles	Re 10,000 (daily ventilation) + Re 1,000 (smoke extraction)
Snow load	SL 250 or SL 550
Low Temperature	T (-15°)
Wind load	WL 1 500 Pa
Resistance to heat	B 300 °C
